

10 REASONS

why to choose NetJapan

1 One technology for all platforms & environments

Protect data and systems of physical and virtual Windows and Linux machines with only one solution. It's easier for IT technicians to master features, best configurations when using ActiImage Protector intuitive interface for all machines of the network and/or all clients' infrastructures and needs.

2 Instant Disaster Recovery for both physical and virtual machine

RTO < 5 minutes – Companies are operational in a few minutes should a disaster strike reducing dramatically downtime at no extra cost! Any system and data are instantly available from not only virtual but also physical machines.

3 Reduce data loss to 5 minutes

RPO < 5 min – Limit the impact of outage with incremental backups or snapshots every 5 minutes. Users and employees are not affected by this background process.

4 Agentless is more

Modern agentless solution for Microsoft Hyper-V and VMware ESXi with no need to install any agent on guest and host machines. Simply install ActiImage Protector Virtual to a machine on the network connected to the hypervisor and the storage device.

5 Automated backup file testing

Backups are checked on creation, chain content and bootability are verified – up to the machine login, and all this automatically! Save IT technician time and proactively ensure backups are restorable at any time. One more opportunity to be effortlessly proactive with DR planning. Don't miss out!

6 Unparalleled deduplication

Save money by reducing onsite storage space and Cloud hosting costs with our sector-based deduplication. Our deduplication is inline and has minimal impact on backup and restore performance unlike other solutions on the market.

Obtain even better deduplication and compression results when using NetJapan agentless solutions: crossed-VM deduplication allows you to reduce even more the size of backup files!

7 Affordable, even for SMBs

We believe any organisation should be able to restore their backups as soon as possible to reduce downtime and its impact on productivity. Companies can benefit instantly restore data and systems in a few minutes at a fraction of the cost of High Availability solutions.

Choose your licencing from perpetual/outright or subscriptions options for more flexibility.

8 Integrate it with any offsite backup strategy

Includes unlimited replication of backup chains to local, network or offsite locations including hybrid, public or private **Cloud**. It integrates easily with the onsite and offsite Backup & Instant Disaster Recovery strategy you wish!

Using **rotating storage device** as offsite backup strategy? ActiImage Protector allows you to automatically eject backup files after creation when stored on USB/RDX devices!

9 We offer Backup Services like no one else!

We look after your backups because we know they may be the only data that allows your company to survive should a disaster happen! Our affordable modular approach to backup and DR services allows you to choose what best correspond to your infrastructure and needs.

- **Backup Services** to choose: installation, monitoring, recovery, etc...
- **Cloud Storage**: includes real-time monitoring in an EU data protected datacentre.
- **Software**: licence flexibility.

10 One technology for the entire Business Continuity Plan
