

Solution overview

NetJapan develops affordable backup and disaster recovery solutions for physical and virtual Windows & Linux machines.

Our easy-to-integrate software allows you to create a real up-to-date Business Continuity strategy to protect your data, your systems and your company against any failure, attacks or disasters.

Why should you use NetJapan Backup & DR solutions?

Instantly recover machines from physical and virtual environments

RTO⁽¹⁾ < 5 min — Your systems and company are operational in a few minutes should a disaster strike, independently if the protected machine was on a OS installed directly on the hardware, on VMware or on Microsoft Hyper-V.

Reduce data loss with incremental backups every 5 min

RPO⁽²⁾ < 5 min — Limit the impact of outage by backing up to 12 times an hour. Users and employees are not affected by this background process.

Agentless backup for Hyper-V and VMware

Backup all VMs at ones without installing any agent on the guest machines nor the host. Simply installed Activelmage Protector on a machine on the network to manage the protection of all physical and virtual machines.

⁽¹⁾ [Recovery Time Objective](#)

⁽²⁾ [Recovery Point Objective](#)

Simply replicate your backups onsite, offsite and in the Cloud for free

Replicate to any offsite or Cloud location like a datacenter, an Amazon S3 target, another office, or simply to another local target or a network location via (secure) FTP and WebDAV. Manage also your backup retention policy and consolidate your backup chains to ensure a smooth, reliable and fast restore.

Test the recoverability of your backups anywhere, at any time or automate it!

Boot a recovered machine in 2 minutes from any full or incremental backup file and see with your own eyes that you are **DisasterReady**. Test and apply your Business Continuity strategy and ensure backups are working in a couple of minutes. You can even automate this process for all newly created backups!

Flexible restore, migration and failback

P2P, P2V, V2V, V2P — Use it across any platforms.

Unparalleled deduplication

Saves money by reducing onsite storage space and Cloud hosting costs with our sector-based deduplication. Our deduplication is inline and has minimal impact on backup and restore performance, unlike other solutions on the market.

Affordable, even for SMBs

We believe any organisation should be able to restore their backups as soon as possible to reduce downtime and its impact on productivity. We offer Instant availability solutions to access your data and systems in a few minutes at a fraction of the cost of High Availability solutions.

Japanese know-how, local support

As a country, Japan is no stranger to disaster, nor is it to High Tech! For over 15 years NetJapan has been developing its proprietary technologies, quickly becoming a trusted reference in reliable backup, disaster recovery and availability for businesses representing 20% market share of this market in its native land.

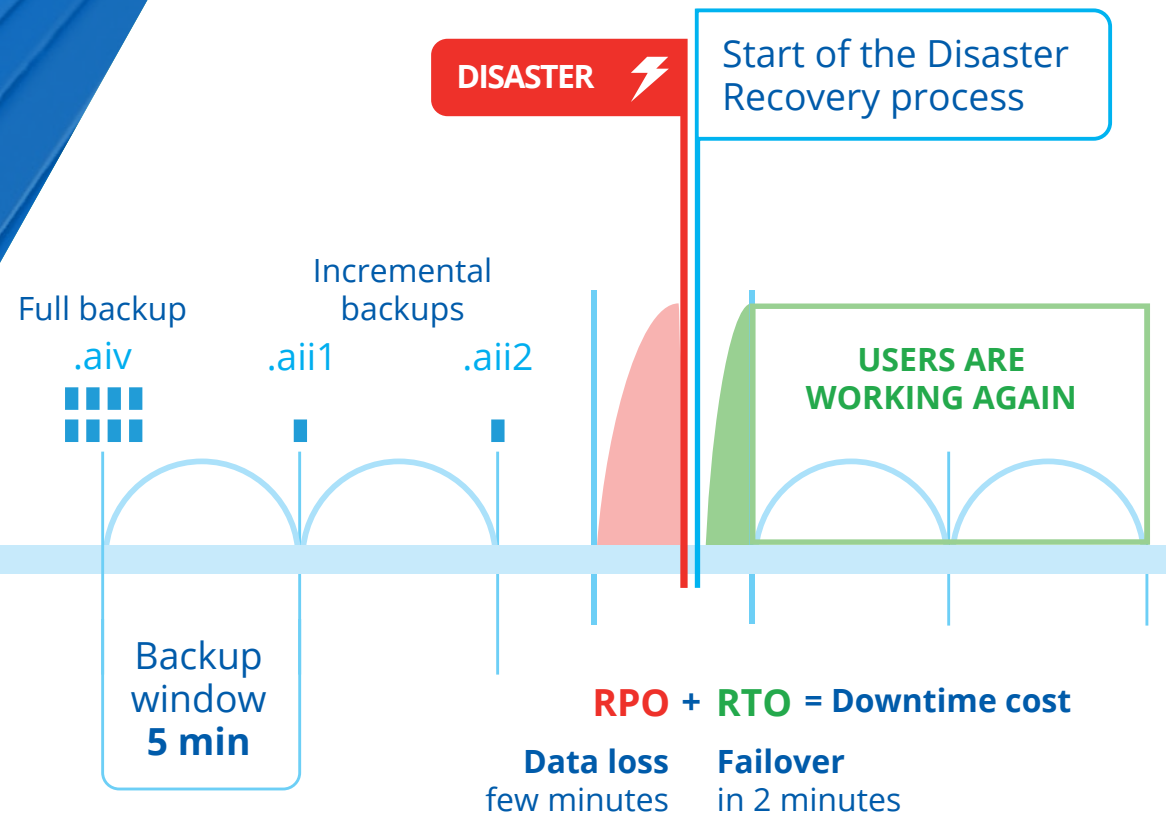

The European offices offer sales, pre-sales and technical support in different languages from a team of experts.

Build a reliable Backup & Disaster Recovery strategy

- ✓ **Incremental hot sector-based backups** made every 5 minutes with a retention of your choice.
- ✓ **Inline Data Deduplication Compression (IDDC)** feature to reduce and control onsite and offsite backup storage requirements.
- ✓ **Free replication** for better protection against any type of disaster including file corruption, ransomware, malware and virus infection, as well as human errors and natural disasters.
- ✓ **Integrated backup testing**
- ✓ **Free 2 minute failover for physical and virtual machines** in a VirtualBox, Hyper-V or VMware environment without interrupting business operations or the live backup chain.

- ✓ **Instant availability for Windows and Linux machines** to a stable Hyper-V or VMware platform that can be used for a 2 minute migration.
- ✓ **Failback** from a failover environment to your repaired physical or virtual machine.
- ✓ **Bare-metal restore** to the same, similar and different hardware or to a hypervisor: P2P, P2V, V2P, V2V.
- ✓ **1 click virtualisation** that simplifies the work for your technicians.
- ✓ **Support latest technologies and legacy OSes.**

NetJapan's products & licencing

	SOLUTION NAME	AGENT-/HOST-BASED	OS	LICENCE	
FOR VIRTUAL ENVIRONMENTS	ActiveImage Protector Virtual HyperAgent Basic	Agentless Agent-based		Per host, for unlimited number of VMs. <i>(Install it on the host to also back it up)</i>	
	ActiveImage Protector Virtual HyperAgent Enterprise			Over 20 VMs. Host agnostic.	
	ActiveImage Protector Virtual HyperAgent 3 VM	Agentless Agent-based		Up to 3 VMs. Host agnostic.	
	ActiveImage Protector Virtual HyperAgent 1 VM			Per VM.	
FOR PHYSICAL & VIRTUAL ENVIRONMENTS	 ActiveImage Protector Server				
	ActiveImage Protector SBS				
	ActiveImage Protector Desktop	Agent-based		Per OS.	
	ActiveImage Protector Personal				
	ActiveImage Protector Linux				
	ActiveImage Protector IT Pro (No incremental backups)	No agent installed		Yearly technician's licence for use on an unlimited number of systems. Solution for IT Technicians.	
ADDS-ON	 HyperBoot	HyperBoot			
	 ImageCenter LE	ImageCenter LE		Free. Included with ActiveImage Protector.	
	 vStandby AIP	vStandby AIP	Agent-based		Per OS, unlimited ActiveImage Protector backup image sets.
	 ActiveVisor	ActiveVisor			Free.

Case study

IT Reseller **Stefan Henningsen** has worked with Acronis, StorageCraft, Veeam and NetJapan.

Testimonies

“NetJapan solutions are easy to use, efficient and working well. I have been using them since 3 years and in case of need I have always managed recovery quickly.

The company is really attentive to market’s needs and in these years I had appreciated the continue grown and evolution of the solutions.

I have a positive feedback also about technical support which is quick and precise.”

— **Fabio Cazzaniga**
BRAINDATA

“Over the last 12 months, I have equipped over 50 new customers with NetJapan, and I underline that all customers are absolutely enthusiastic about the product and the performances. No other manufacturer has a better support than NetJapan, and the sales team offers a flawless service at all times.”

— **Jean-Pierre Zöbeli**
Owner, ComptNet GmbH
